PROFESSIONAL SUMMARY

Senior Digital Analytics & Performance Marketing professional with 5+ years turning behavioral, campaign, and CRM data into revenue decisions for enterprise banking and retail (Simplii Financial, Walmart Canada). Works hands-on across the full measurement stack, including Google Analytics 4 (GA4), Adobe Analytics, Google Tag Manager (GTM) with server-side tagging, BigQuery SQL, Python, Looker Studio, Tableau, and Power BI, spanning everything from dataLayer architecture and consent-compliant tracking (Consent Mode v2, PIPEDA/GDPR) through multi-touch attribution, marketing mix modeling, and executive reporting. Owned execution and optimization of multi-channel paid media worth \$400K+/month (\$5M+ annualized) across Google Ads, Meta, and LinkedIn, and led CRO programs that lifted conversion 21% and cut CPA 22%. Builds measurement that survives audits, ad blockers, and the cookieless shift, and translates performance data into actionable insights, clear next steps, and decisions executives act on. Equally equipped for broader data analysis and business intelligence (BI) roles such as SQL, BigQuery, Python, Excel, Tableau, and Power BI, with analytics experience spanning marketing, product, e-commerce, and operations.

CAREER HIGHLIGHTS

- Lifted lead conversion 21% in 6 months through a sitewide CRO and multivariate testing program at Simplii Financial.
- Cut CPA 22% while maintaining lead volume across \$400K+/month (\$5M+ annualized) in paid media on Google, Meta, and LinkedIn.
- Boosted CTR 28% and conversion rate 19% through structured ad copy and landing page experimentation.
- Delivered 2x YoY organic traffic growth and 18% paid budget savings at Walmart through analytics-led optimization.
- Standardized UTM governance across all channels, improving reporting consistency 95%.

SKILLS

Analytics & Measurement: Google Analytics 4 (GA4), Adobe Analytics, Firebase, web & app analytics, event-based tracking, funnel analysis, funnel diagnostics, scroll-depth tracking, on-site search analytics, audience segmentation, web analytics, customer insights, organic search analysis

Tagging & Implementation: Google Tag Manager (GTM), server-side tagging (sGTM), Adobe Launch, dataLayer architecture, ecommerce tracking, conversion events & pixel tracking, Measurement Protocol, Consent Mode v2, cross-domain tracking, tag auditing & QA, conversion tracking

Data & Querying: BigQuery, SQL, Python (pandas, matplotlib), SAS, GA4 BigQuery export, ETL, data modeling, data quality assurance

Attribution & Measurement Science: multi-touch attribution (MTA), data-driven attribution (DDA), marketing mix modeling (MMM), incrementality testing, ROAS, CPA, CPL, CAC, LTV, cohort & retention analysis

CRO & Experimentation: A/B testing, multivariate testing (MVT), Adobe Target, Google Optimize, Hotjar, Quantum Metric, Glassbox (SessionCam), session replay, heatmaps, heuristic evaluation, landing page optimization, user experience (UX) optimization

Paid Media & Performance Marketing: Google Ads (Search, Performance Max, Display, YouTube), Meta Ads (Meta Business Manager), LinkedIn Ads (Campaign Manager), paid search (SEM), paid social, bid strategy, quality score & impression share optimization, retargeting, audience building, budget pacing & reallocation, media buying, remarketing, growth marketing, campaign management, display advertising, social media advertising

Visualization & Reporting: Looker Studio, Tableau, Power BI, Excel, executive dashboards, automated reporting, data storytelling, data visualization, dashboard development

CRM & MarTech: Salesforce Marketing Cloud, HubSpot, email & nurture workflow measurement, demand generation, personalization, suppression logic, UTM governance, campaign taxonomy, email marketing, marketing operations, martech stack, lead generation, MQLs (marketing-qualified leads), customer segmentation

Privacy & Governance: PIPEDA, GDPR, CCPA, consent management platforms (CMP), first-party data strategy, cookieless measurement, data governance

Ways of Working: JIRA, Miro, Agile/Scrum, campaign operations & QA, stakeholder management, client-ready reporting, cross-functional enablement, training & enablement, process improvement

Business Intelligence & Analysis: business intelligence (BI), KPI frameworks & reporting, ad hoc analysis, requirements gathering, trend analysis, data cleaning & wrangling, Excel pivot tables & lookups, predictive analytics, statistical analysis, hypothesis testing, statistical significance, forecasting, root cause analysis, anomaly detection, benchmarking, data-driven decision making, Google Sheets, VLOOKUP & XLOOKUP

Product & E-commerce Analytics: product analytics, user behavior & engagement analysis, retention & churn analysis, feature adoption, conversion funnels, cart abandonment analysis, customer journey & pathing analysis, e-commerce KPIs (AOV, conversion rate), funnel optimization

WORK EXPERIENCE

Senior Analyst – Digital Analytics

03/2023 – Current

Simplii Financial, Toronto, ON

Web & App Analytics

- Architected Google Analytics 4 (GA4) measurement across 20+ B2B/B2C properties, delivering dataLayer specs, GTM container builds, and full ecommerce and funnel event schemas, with BigQuery export powering attribution models and audience activation.
- Led the Adobe Analytics to GA4 migration, rebuilding event taxonomy, pathing analysis, and custom channel groupings while preserving omnichannel attribution continuity through the Universal Analytics sunset.
- Implemented consent-aware tracking architecture using Consent Mode v2, consent management platform (CMP) signals, and server-side tagging (sGTM), protecting data quality and PIPEDA/GDPR compliance against ad blockers and browser privacy restrictions.
- Supported end-to-end campaign execution by preparing target lists, validating data, and ensuring deployment readiness across channels.
- Worked with large customer-level datasets to power offer targeting, personalization, and suppression logic.
- Partnered with marketing and CRM teams across Salesforce Marketing Cloud and HubSpot to translate campaign requirements into clean, actionable datasets.

Conversion Rate Optimization (CRO)

- Spearheaded a sitewide conversion rate optimization (CRO) program that lifted lead conversion 21% in 6 months using heatmaps, scroll-depth analysis, and multivariate testing (MVT).
- Partnered with UX to A/B test CTA verbiage, button placement, and layout structures across landing pages.
- Designed and ran controlled experiments in Adobe Target, including A/B tests, multivariate testing (MVT), and audience-based personalization with profile scripts and experience targeting, applying rigorous statistical inference: pre-test sample-size and power analysis, minimum detectable effect (MDE) sizing, confidence intervals, and both frequentist and Bayesian evaluation.
- Owned the full experimentation lifecycle, from hypothesis framing and traffic allocation through in-flight monitoring, guardrail-metric tracking, and post-test analysis, calling winners only at statistical significance and codifying results into a reusable test-and-learn knowledge base.
- Strengthened site instrumentation through Adobe Launch and the Adobe Experience Platform Web SDK, building dataLayer design, event schema, processing rules, and custom variables (eVars, props, success events) for reliable, privacy-compliant measurement.
- Leveraged Quantum Metric session replay to identify friction points and improve the mobile checkout flow.
- Conducted heuristic evaluations across high-exit pages and redesigned navigation pathways, reducing bounce rate 18%.

Campaign & Channel Analytics

- Built multi-channel campaign performance scorecards unifying CRM (Salesforce Marketing Cloud, HubSpot), GA4, and ad-platform data to evaluate CPA, CPL, ROAS, and CAC.
- Led Salesforce Marketing Cloud and HubSpot integration with GA4 to measure the impact of email nurture workflows on return visits and purchases.

- Performed multi-touch attribution (MTA) modeling with custom rules in BigQuery SQL, using AI-augmented query development to accelerate and optimize complex SQL, to determine true ROI of display, search, and affiliate channels.
- Automated weekly campaign dashboards in Looker Studio with real-time UTM drilldowns and channel summaries.
- Integrated AI-assisted and LLM-powered workflows into the analytics practice, using prompt-engineered SQL and Python generation, automated first-draft reporting and documentation, and rapid insight prototyping to improve turnaround on ad hoc analysis requests without compromising data accuracy or review rigour.

Paid Media Execution & Optimization

- Owned hands-on execution and optimization of paid search and paid social across Google Ads, Meta Ads, and LinkedIn Ads, managing \$400K+ monthly budgets (\$5M+ annualized).
- Launched and optimized full-funnel acquisition and retargeting campaigns, reducing CPA 22% while maintaining lead volume.
- Performed daily in-platform optimizations across bid adjustments, keyword expansion, audience exclusions, and budget reallocation to hit ROAS targets and improve quality score and impression share.
- Partnered with creative and lifecycle teams to test ad copy and landing pages, increasing CTR 28% and conversion rate 19%.
- Integrated GA4, Adobe Analytics, and ad-platform data to drive real-time optimization decisions and weekly spend reallocation.

Advanced Analytics & Enablement

- Built product engagement and lifetime value (LTV) cohort models in BigQuery to map retention patterns, feature adoption curves, and demand-forecasting signals for planning.
- Prepared and validated marketing and customer datasets to support campaign execution, targeting, and personalization initiatives.
- Performed audience segmentation and campaign performance analysis using SQL, Python, and CRM data, leveraging AI-assisted workflows (LLM-generated SQL and AI-augmented exploratory analysis and code review) to compress turnaround time.
- Conducted data quality checks and resolved discrepancies to ensure accurate campaign delivery and reporting.
- Presented monthly analytics readouts to the C-suite, translating digital KPIs into actionable insights, clear next steps, and recommendations tied to revenue targets.
- Trained 12+ cross-functional team members to self-serve in GA4, fostering a data-informed culture.

Digital Analytics Analyst

01/2021 – 03/2023

Walmart, Toronto, ON

Web & App Analytics

- Deployed full event-based tracking across web and mobile apps using GA4 and Firebase, capturing 300+ user interactions.
- Designed customer funnel visualizations in Tableau, connecting BigQuery datasets to daily executive dashboards.
- Managed ecommerce tag implementations in GTM, covering cart, coupon usage, product impressions, and abandonment tracking.
- Ran monthly tag audits and data QA, resolving broken tags, double-counted events, and misattributed channels, using AI-assisted scripting to automate validation checks and speed up debugging.

Conversion Rate Optimization (CRO)

- A/B tested homepage vs. category-page CTAs with UI/UX, increasing CTR 25% and conversion 17%.
- Conducted scroll-depth and session analysis in Hotjar to optimize content placement and reduce bounce rate.
- Implemented conversion funnel event tracking for form fills, downloads, and product trials, improving lead-tracking accuracy 40%.
- Created automated Google Analytics Intelligence alerts for major drops in funnel performance and outages.

Campaign & Channel Analytics

- Audited and optimized paid campaigns across Google, Facebook (Meta), and LinkedIn, sharpening targeting to save 18% of budget with no loss in performance.

- Led end-to-end product-launch reporting: pre-launch baselines, post-launch lift, and channel attribution.
- Built Looker Studio dashboards for real-time ROAS monitoring by campaign, geo, and device type.
- Partnered with SEO to measure organic impact of content refresh projects using Google Search Console and GA4, achieving 2x traffic growth YoY.
- Built an on-site search analytics layer capturing query strings, result counts, and downstream conversion events, surfacing top queries by volume and zero-result rate to guide search and content optimization.

Advanced Analytics & Enablement

- Built marketing mix models (MMM) from historical campaign data to reallocate budget toward high-ROI channels.
- Introduced standardized UTM naming conventions across all channels, improving reporting consistency 95%.
- Facilitated monthly “analytics office hours” supporting product, content, and marketing teams with data needs.

EDUCATION

Bachelors – Karunya University

CERTIFICATIONS

- Google Analytics Advanced Certification | Jun 2023
- Microsoft Certified: Data Analyst Associate | May 2022
- Tableau Desktop Specialist | Feb 2022
- Advanced SQL for Data Science | Jan 2022

TECHNICAL PROFICIENCY

Analytics Platforms: Google Analytics 4 (GA4), Universal Analytics, Adobe Analytics, Adobe Analytics Workspace, Firebase Analytics, Mixpanel, Amplitude, Tealeaf, FullStory, app telemetry & mobile analytics, GA4 raw data export

Tag Management & Instrumentation: Google Tag Manager (GTM), server-side GTM (sGTM), Adobe Launch, Adobe Experience Platform Web SDK, Tealium, custom dataLayer design, event schema architecture, custom variables (eVars, props, events), JavaScript tag validation, Measurement Protocol, Google Consent Mode v2

Experimentation & Personalization: Adobe Target, Optimizely, VWO, Google Optimize, A/B testing, multivariate testing (MVT), multi-armed bandit, audience targeting, profile scripts, frequentist & Bayesian inference, sample-size & power analysis, minimum detectable effect (MDE), funnel diagnostics

Data Warehousing & Engineering: Google BigQuery, BigQuery ML, Snowflake, PostgreSQL, GA4 raw data export, SQL, ETL pipelines, Cloud Scheduler, API connectors, data modeling, data pipeline automation

Programming & Statistics: Python (pandas, NumPy, matplotlib, scikit-learn, statsmodels), SQL, regression, cohort & survival analysis, hypothesis testing, statistical significance, forecasting, demand forecasting, lifetime value (LTV) modeling, time-series analysis

Attribution & Marketing Science: multi-touch attribution (MTA), data-driven attribution (DDA), Markov chain attribution, Shapley value allocation, time-decay weighting, last-click baselining, marketing mix modeling (MMM), incrementality testing, media mix optimization, cross-device & identity resolution

Business Intelligence & Visualization: Tableau, Microsoft Power BI, Power Query, Google Looker Studio, Microsoft Excel (advanced), Google Sheets, executive dashboards, narrative dashboards, metric dictionaries, KPI scorecards

Paid Media & Ad Platforms: Google Ads, Google Search Ads 360 (SA360), Display & Video 360 (DV360), Meta Ads Manager, LinkedIn Campaign Manager, programmatic & DSP fundamentals, audience activation, remarketing, Google Search Console (GSC), click-through rate (CTR) optimization, ad viewability measurement

CRM, MarTech & CDP: Salesforce Marketing Cloud, HubSpot, Adobe Experience Cloud, Eloqua, Marketo, customer data platform (CDP) concepts, audience segmentation, lead scoring, email & nurture automation

Delivery, Governance & Collaboration: Agile, Scrum, Kanban, JIRA, Confluence, Miro, Azure DevOps (ADO), data governance, privacy compliance (PIPEDA, GDPR, CCPA), workshop facilitation, analytics enablement

AI & LLM Applications: large language models (LLMs), generative AI for analytics, prompt engineering, AI-assisted SQL & Python development, AI-augmented data analysis & insight generation, AI-driven attribution &

predictive audiences (GA4), answer-engine optimization (AEO) & AI referral traffic measurement, automated reporting & narrative generation

CORE COMPETENCIES

Digital Measurement Strategy • Conversion Rate Optimization (CRO) • Experimentation Program Design • Web & App Analytics • Marketing Attribution • Customer Journey Analytics • Funnel Analysis & Optimization • Behavioural Analytics • Personalization Strategy • Audience Segmentation • Data Storytelling • Executive Reporting & Stakeholder Communication • Data Quality Assurance & Tag Governance • First-Party & Cookieless Measurement • Predictive & Statistical Modeling • Performance Marketing Analytics • Revenue & Growth Analytics • Cross-Functional Enablement • Test-and-Learn Culture Building • Insight-to-Action Translation
